PROFESSIONAL SUMMARY

Technical Operations Executive with hands-on experience in MIS reporting, SQL-driven data analysis, and dashboard development within forex/fintech trading operations. Skilled in extracting, validating, and visualizing data from CRM and trading platforms (MT4/MT5) using SQL, Excel, and Python to support business and compliance decision-making. Strong foundation in building automated reporting solutions, with a track record of translating raw data into clear, actionable insights for stakeholders.

SKILLS

Data & Reporting: Advanced Excel (Pivot Tables, Lookups, Complex Formulas), SQL, MIS Reporting, Data Extraction & Validation, Dashboarding (Streamlit, Plotly)

Languages: Python, SQL, C, HTML, CSS, JavaScript

Frameworks & Libraries: Flask, SQLAlchemy, Pandas, Tailwind CSS, Bootstrap

Tools & Platforms: MySQL, SQLite, Git, GitHub, REST APIs, MT5 Administration, CRM Operations

Core Strengths: Stakeholder Communication, Analytical & Problem Solving, Attention to Detail, Cross-Team Coordination

WORK EXPERIENCE

Technical Operations Executive | Rotex IT Solutions

January 2026 – Present

- Operate CRM systems for client account management, commission tracking, and reporting, ensuring data accuracy across multiple sources for daily and ad-hoc MIS deliverables.
- Manage daily technical operations using MT5 Terminal, MT5 Manager, and MT5 Administrator platforms, monitoring trading activity and account-level data.
- Perform data extraction, validation, and reconciliation to support broker and client reporting, and to resolve account or platform-related issues.
- Coordinate with cross-functional teams to ensure smooth execution of trading workflows and timely, accurate reporting.

PROJECTS

Trader Insight Dashboard – Trading Analytics & Reporting Tool

Python, Streamlit, Plotly, Pandas

- Built an analytics dashboard to process and visualize MT4/MT5 broker statement Excel exports, automating data extraction, cleaning, and validation for trading performance reporting.
- Designed interactive scorecards and charts (P&L, win rate, drawdown, and trade-level breakdowns) to translate raw multi-source trade data into actionable insights.
- Resolved data-formatting and rendering issues (including chart color-encoding bugs) to improve reporting accuracy and reliability.
- Iterated from an initial Flask prototype to a production Streamlit application based on evolving reporting requirements.

Auto Sarathi – Real-Time Ride Booking Platform

React.js, Vite, Tailwind CSS, Node.js, Express.js, Socket.IO, Supabase, PostgreSQL, PostGIS, JWT, LocationIQ

- Developed a full-stack platform enabling real-time ride matching and live location tracking, with JWT-based authentication and role-based access control for Users, Drivers, and Admins.
- Designed RESTful APIs and integrated Supabase PostgreSQL with PostGIS for geospatial queries and real-time data synchronization via Socket.IO.

DocManager

Python, Flask, SQLite, SQLAlchemy, Bootstrap, HTML, CSS, JavaScript

- Built a full-stack clinic management system with authentication, dashboard analytics, and search functionality for patient records and visit tracking.

EDUCATION

Sanjay Ghodawat University — B.E./B.Tech, Computer Science and Engineering

Kolhapur, India | CGPA: 8.03 (Semester 6) | Sept 2022 – Present

K.L.E.'s Independent PU College — PUC, PCMB

Nipani, India | Percentage: 86% | June 2020 – June 2022

CERTIFICATES

- Python Crash Course — Udemy, June 2025: Core Python syntax, data types, and control structures through hands-on projects.
- HTML5, Python, Flask Framework — All-in-One Complete Course, August 2024: Web development fundamentals, backend routing, templating, and deployment basics.
